

ANNOUNCEMENT

As part of the continuous updates released for the public, HEDNO would like to announce that strong efforts for the restoration of electricity at the islands of Rhodes and Halki are still ongoing.

Due to the fire which broke out earlier on the island, water scooping caused serious problems at the High Voltage Network and electricity was initially cut at the N. Rhodes ΘΗΣ and then at the Soronis ΑΗΣ, resulting in the general cut of electricity at the Rhodes-Halki complex.

About one hour ago, the gradual restoration of electricity for the consumers of the city of Rhodes was initiated while the entire technical staff of HEDNO in close cooperation with PPC and in coordination with Civil Protection are making extensive efforts for the restoration of all other units.
