

COMMUNICATION

Indicative schedule of alternate electricity cuts in Kos - Kalimnos

As part of the continuous and complete updates for the public, HEDNO would like to announce that, due to the damage caused on the PPC Units at the Kos Autonomous Generation Stations and the temporary decline of production due to the extreme high temperatures, short, half-an-hour alternate electricity cuts have been scheduled for today, 3 August 2021, up to the afternoon, to ensure the smooth running of the electricity system.

As part of the coordinated efforts to ensure the smooth operation of the electricity system at Kos-Kalimnos, HEDNO is asking all consumers to limit unnecessary electricity consumption, particularly for the peak hours between 12:00 and 14:00 and between 19:00 and 23:00.

For these hours, consumers are asked to:

- Avoid using electric devices (washing machine, kitchen stove, water heater etc.) and try to use these during off-peak hours.
- Set the air conditioner temperature at 26 degrees.

The reasonable use of these devices during these extreme weather conditions will significantly contribute towards energy saving and towards avoiding any electricity problems by ensuring all citizen's health and safety as well as the best services provided.

HEDNO would like to apologize for any inconvenience caused and thank its consumers in advance for their active participation in the effort to reduce electricity consumption.
